

Controllers Quickstart: Monitoring Applications

Course Description

The **Controller Quickstart Online Series** provides an accessible introduction to topics focused on GE Intelligent Platforms Controllers and Proficy Machine Edition programming software.

The **Monitoring Applications** course is designed to provide an overview of using Logic Developer PLC Programmer to monitor the application executing in the Controller.

Who Should Attend?

This course is designed for those who design, develop, deploy and maintain GE Intelligent Platforms control systems with Proficy Logic Developer PLC.

Are There Any Prerequisites?

Participants should have a working knowledge of Internet Explorer and Windows operating systems. All participants also need an account at the GE Intelligent Platforms training portal – EDGE.

What Tasks Will Be Taught in This Online Course?

Upon completion of this Course, the student will be able to:

- Describe the application data monitoring tools available in the Logic Developer PLC programming software, including Logic Editors, Data Watches, Reference View Tables, and the Data Monitor tool.
- View live Controller data using the Ladder Diagram Editor.
- Configure Controller data monitoring tools, including Data Watches, Reference View Tables, and the Data Monitor.
- Monitor and Modify Controller data using configured data monitoring tools.
